

SNAPSHOT ROUTING

Scenario # 2

- File Preparer creates the snapshot and routes it to the Candidate for Approval. The candidate finds an error and sends it back to the File Preparer (Initial Queue). File Preparer forwards it to the Candidate once refreshed and the Candidate forwards it to the Chair. The Chair approves the snapshot and forwards it to the File Preparer's Final Queue. The Snapshot is opened to faculty, they vote (off-line) and the snapshot is sent to the Dean's office. It then is routed to Academic Personnel.
